Juni 26, 2024

Description
Production employees are deployed – depending on their suitability – in the areas of printing or painting.

Responsibilities / Main tasks
Your tasks include:

- Selecting product-specific materials according to the data sheet
- Setting up and equipping the printing systems
- Checking and optimizing the printing process in accordance with quality standards
- Measuring and testing activities as part of quality assurance
- Checking and testing during production
- Recording order-related data for quality control
- Maintenance and care of the production systems

Qualifications / Requirements
What you should bring with you:

- You have completed training as an offset printer or media technologist and are interested in technical topics
- In-depth experience in operating sheet-fed offset printing machines and have a strong awareness of quality
- You have technical expertise, an analytical mindset and a solution-oriented approach
- Willingness to work 3 shifts
- Safety awareness when carrying out your work is a given for you
- You are enthusiastic, willing to perform, flexible and motivated to take on new and interesting challenges
- You enjoy working in a team towards common goals and have a high willingness to learn
- You are reliable and work in a goal-oriented and structured manner

Employment benefits
What we offer you:

- modern workplace with the latest measurement and control technology
- young team
- a crisis-proof job in the food supplier industry
- above-standard pay taking your personal professional experience into account
- Christmas bonus and vacation pay
- tax advantages through various benefits in kind
