IT system administrator

Description

The company PS Printservice GmbH is looking for an IT system administrator as soon as possible. We are a medium-sized, owner-managed family business in the field of surface finishing. As a supplier to the food packaging industry, we paint and print steel and aluminum sheets, most of which are further processed into crown caps and screw caps.

Responsibility / Main Tasks

Your area of responsibility includes the following activities:

- Installation, operation, support, and further development of the heterogeneous IT infrastructure, consisting of local components and cloud services
- Maintenance and administration of physical and virtual servers and clients
- Improvement of existing support processes
- Participation in the conceptualization and implementation of IT projects, as well as the introduction of new systems
- Consulting and implementation of IT solutions for the respective application areas in collaboration with project teams

Qualifications / Requirements

You should bring the following:

- Completed education and work experience
- Practical experience in building and operating complex IT infrastructures in a Windows environment
- Experience and knowledge in network operations
- Good knowledge in several of the following areas: Active Directory, DNS, DHCP, Microsoft 365, Backup
- Willingness to learn new technologies and methods and to implement them practically
- Team and communication skills, as well as a structured and independent working style
- Knowledge in the following areas:
 - Server infrastructure: Windows Server [2022, 2019, 2016, 2012 R2]
 - Client infrastructure: Windows [11, 10, 8.1, 7]
 - Virtualization: VMware
 - Network/IT Security: Firewall, VPN
 - Data and storage networks: LAN, WLAN, WAN, SAN
 - Programming languages: PowerShell

Benefits of the Employment

Here's what we offer you:

- We are a strong team of dedicated employees who meet each other at eye level. The management's doors are always open. We continuously work on improving our communication and internal processes.
- Flexible working arrangements: on-site, hybrid, and remote options, both full-time and part-time
- Training period and continuing education
- Attractive salary
